

Dairy farm with contracting business in Canada

From April/May (harvest time) or from February/ March (cattle breeding) for a period of 3 and more months.

Company & Job Details:

In southwestern Ontario, we operate a dairy farm and grow our own corn, silage, and soybeans. In addition, we operate a contracting company that specializes in various field operations such as sowing, harvesting, plowing, or mucking out. For the different field works we have our own large machine park with workshop.

The job offer:

During harvest time, your tasks include soil cultivation, sowing, spraying, plant protection, harvesting, general agricultural work, driving agricultural machinery / construction machinery, maintenance / repair of machinery and vehicles and transport of the grain. However, depending on the company, you will also learn about the business side of farming.

During the time of cattle breeding, you can help with tasks such as branding, castrating, calving, artificial insemination, and health control.

Requirements:

- Certified farmer or work experience
- valid driver's license
- Skill in handling machines, care, and maintenance
- flexible applicable

What is offered:

- Fair and competitive compensation depending on experience
- Varied and interesting work in a positive team
- Large machine park
- Accommodation in a separate house
